EDUCATION

JIS College of Engineering, Kalyani

Bachelor of Technology in Computer Science and Engineering (AI & ML)

2024-2028

PROJECTS

1. Jharkhand Tourism Website (Html, CSS, JavaScript, Python, SQLite, Nodejs)–

- Developed a responsive tourism website to showcase **Jharkhand's tourist destinations, culture, history, and local attractions** through an intuitive user interface.
- Built dynamic frontend pages using **HTML, CSS, and JavaScript**, ensuring a mobile-friendly design and seamless user experience across devices.
- Developed backend functionality using **Python** and **Node.js**, with **SQLite** for efficient storage and retrieval of tourism-related data.
- Implemented interactive features including destination listings, navigation, and organized content presentation to improve user engagement.
- Successfully deployed the website on **AWS EC2** using the custom **Vibe Deploy** CLI-based deployment platform, demonstrating real-world cloud deployment and DevOps integration.

2.Vibe Deploy | AI-Powered Cloud Deployment Platform (Python, Fast API, Terraform, AWS EC2, Nginx, Shell Scripting, GitHub)

- Developed a **terminal (CLI)-based** cloud deployment platform that automatically deploys web applications from a GitHub repository to AWS EC2 using a single command.
- Automated cloud infrastructure provisioning using **Terraform (Infrastructure as Code)**, including EC2 instance creation, networking, and security group configuration.
- Built a **Fast API** backend to process deployment requests and orchestrate the end-to-end deployment workflow.
- Implemented a universal deployment script that clones repositories, detects project structure, configures **Nginx**, sets permissions, and deploys applications without manual intervention.
- Reduced deployment time from **hours to minutes** by automating server setup and deployment, minimizing configuration errors, and improving deployment consistency.

TECHNICAL SKILLS

- **Programming:** Python (NumPy, Pandas), C, C++
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code, pip, MS Copilot, Power BI
- **Core Concepts:** Data Structures, OOP, Databases, Operating Systems, Computer Networks
- **Soft Skills:** Public Speaking, Leadership, Critical Thinking
